

FIRE BY **escea.**

Before social media, there was just social.

People are naturally drawn to flames and an Escea fireplace quickly becomes a home's social hub, encouraging face-to-face interaction and discussion deep into the night.

With the perfect balance of form and function, Escea gas fireplaces are made for modern homes and busy lives. Using the latest in gas fireplace technology, an Escea delivers heat that's both powerful and efficient.

"We take great pride at being made in New Zealand and tapping into the incredible pool of local technology and design talent. I marvel at what our team of designers and engineers can achieve and love seeing people interact in front of our fireplaces. I guess there are some things you just can't do on Facebook"

ALEX HODGE
Lead Designer

Fireplace, anyplace

Escea's flexible flues run up, down or even sideways, for complete design freedom.

Born in New Zealand

Designed and made in the deep south of New Zealand, the best place to test the limits of heat and efficiency.

Crafted with care

From concept to completion, our people take pride in every fireplace they have a hand in making.

Our Fireplaces

Get to know Escea's wide range of fireplaces.
There's (at least) one for every home and every lifestyle.

Indoor Gas Single or Double Sided

Ultra-wide high heat output gas fireplaces to effortlessly heat one, two or multiple rooms.

DX1000, DX1500
(Multiroom) Pg 4

DS1150, DS1400, DS1650
(High Output) Pg 8

Indoor Gas Single Sided

Efficiently warms your living space while making it feel intimate and cosy.

DL850, DL1100 (High Output) Pg 12
DF700, DF960 (High Output) Pg 16
DFS730 (Freestanding) Pg 22

Outdoor Gas or Wood

Add warmth to any outside gathering with an open front gas or wood fireplace.

EK950, EK1250, EK1550
(Wood) Pg 24
EF5000 (Gas) Pg 28
EW5000 (Wood) Pg 29

DX Series

MULTIROOM | SINGLE OR DOUBLE SIDED

The DX Series combines ultra-wide flame action with Escea's Heat Ducting Technology, which provides heat into several rooms and evenly distributes within the same room. At 1m or 1.5m wide these gas fireplaces make a dramatic statement. Reflective side panels give the appearance of an even wider fireplace and their effect grows exponentially when they're double sided.

Customise the look of your fireplace by choosing between a variety of different fuel beds and frames. With its minimalist aesthetic, the DX Series works with any interior style.

SMART HEAT™

Control the temperature of your home with your smart phone.

MULTIROOM

Duct heat from the fireplace to multiple vents throughout your home.

DX Series Models

Fascia Options

All DX Series fascias are available for both single or double sided fireplaces.

A subtle single bevelled edge to frame the fireplace.

Fascia sizes (mm)
DX1000: 1130w x 430h 40d
DX1500: 1630w x 430h 40d

Being frameless lets the wall itself be the work of art.

Fascia sizes (mm)
DX1000: 1357w x 410h
DX1500: 1560w x 360h

An optional plaster board finishing trim, with clean lines keeps this frame minimal.

Fascia sizes (mm)
DX1000: 1085w x 387h
DX1500: 1583w x 387h

Fuel Bed Options

DS Series

SINGLE OR DOUBLE SIDED

The DS Series has a small footprint and a big impact. These fireplaces are truly frameless drawing your eye straight to the flames – where the wall ends the glass begins.

The large window gives a clear view of the generous fuel bed, large flames and when double sided you can also see the room next door. And being able to flue the fireplace through the ceiling, the floor or the wall – the only limitation is your imagination.

SMART HEAT™

Control the temperature of your home with your smart phone.

TRULY FRAMELESS

Where the wall ends, the glass begins.

DF Series

Escea had renovators in mind when they designed the DF Series. Smaller dimensions and flexible installation make the DF Series ideal for retrofitting into existing cavities.

There is one major difference with this retrofit fireplace – Powered Direct Vent Flue technology. This innovation gives you the flexibility to put the fireplace wherever you like; without the need for cavities or even walls to install. This feature makes the DF Series just as suitable for modern new-builds as retrofits.

SMART HEAT™

Control the temperature of your home with your smart phone.

POWERED DIRECT VENT

Fan-forced airflow for ease of install and design freedom.

DFS730

FREESTANDING

The freestanding DFS730 is designed as a modern gas fireplace replacement for an existing freestanding woodburner, or for installing into a room where you do not have enough wall space for an inbuilt fireplace.

This sleek and black fireplace fits into tight spaces, and it has a large glass window for maximum flame viewing. The beauty of gas is that you get the same flame and same heat as your old woodburner, without the mess or fuss. The Direct Vent Power Flue system draws air from outside the home into a sealed unit, keeping your home free of moisture and fumes.

SMART HEAT™

Control the temperature of your home with your smart phone.

POWERED DIRECT VENT

Fan-forced airflow for ease of install and design freedom.

E Series

OUTDOOR GAS OR WOOD

Fireplaces have a mesmerising quality – people love sitting around them and watching the flames flicker. An outdoor fireplace means you can entertain late into the night, creating a dramatic focal point, that’s warm and inviting for all.

Whether it’s outdoor cooking on a wood fuelled fireplace, or the instant convenience of a gas fireplace – Escea’s outdoor range brings the comfort of indoors, out.

Note: While made from the highest grade materials some rusting may occur with high levels of salt laden sea air.

The Outdoor Fireplace Kitchen

The EK Series wood fireplace comes equipped with everything you need to achieve a smoky meat lover's feast - an Ember Generator, 13-point adjustable cooking plates, grills and meat hooks. Best of all, once the flame cooking is done, it all hides underneath a stainless steel draw. Leaving you with a roaring outdoor fireplace to relax in front of into the small hours.

Grill, then Chill

When not being used, the cooking grills hide underneath the stainless steel lid, giving you a roaring fire sure to get the party started.

Inside, Out

The EK Series features new technology that allows the fireplace to be attached to the home, for greater indoor-outdoor flow.

Professional Grilling

13-point adjustable height grills and an Ember Generator let you cook your food at the perfect temperature, for that delicious flame grilled smoky flavour.

Kitset Enclosure
Frameless Option

Kitset Enclosure

The Kitset Enclosure (KSE) is available for EF5000 and EW5000, and is perfect if your outdoor area doesn't have an existing structure. Simply assemble and then cover the KSE with a waterproof backing board and cladding of your choice. The cladding material for the EW5000 must be fire rated.

The assembled structure has the following dimensions: 1800w x 1200h x 600d (mm). w x 1200h x 600d (mm).

Cooking Plate

The EW5000 wood fireplace comes with an adjustable cooking plate which can be stored under the ash pan when not needed. Escea's Head BBQist says "Remember to let the fire burn down to an ash bed before cooking."

Features

Powered Direct Vent

Our Powered Direct Vent flue achieves greater efficiencies and allows flues up to 12m in length which can be run horizontally or vertically. Flues can finish either on a roof or outside wall and can even be run under a floor. It uses outside air for combustion rather than room air and is a completely sealed system unaffected by other appliances such as extractor fans. With no fumes coming in and no hot room air going out, you can keep warmer and healthier.

A unique feature of Escea fireplaces is Powered Flue technology. This innovation gives you the flexibility to put the fireplaces wherever you like, without the need for cavities or even walls to install. Another benefit of Power Flue is joinery-friendly Zero Clearance installation. The key is the fan-forced airflow, which allows you to install the flues in any direction, making even the most complex flue run possible.

Available on all indoor fireplaces.

Multiroom Heat Ducting

Multiroom, Escea's Heat Ducting Technology, captures up to 90% of the available heat and carries it throughout the house via ceiling and floor vents. The ducting technology allows you to provide heat to more than one room in your home.

Available on:
DX1500, DX1000

Smart Heat

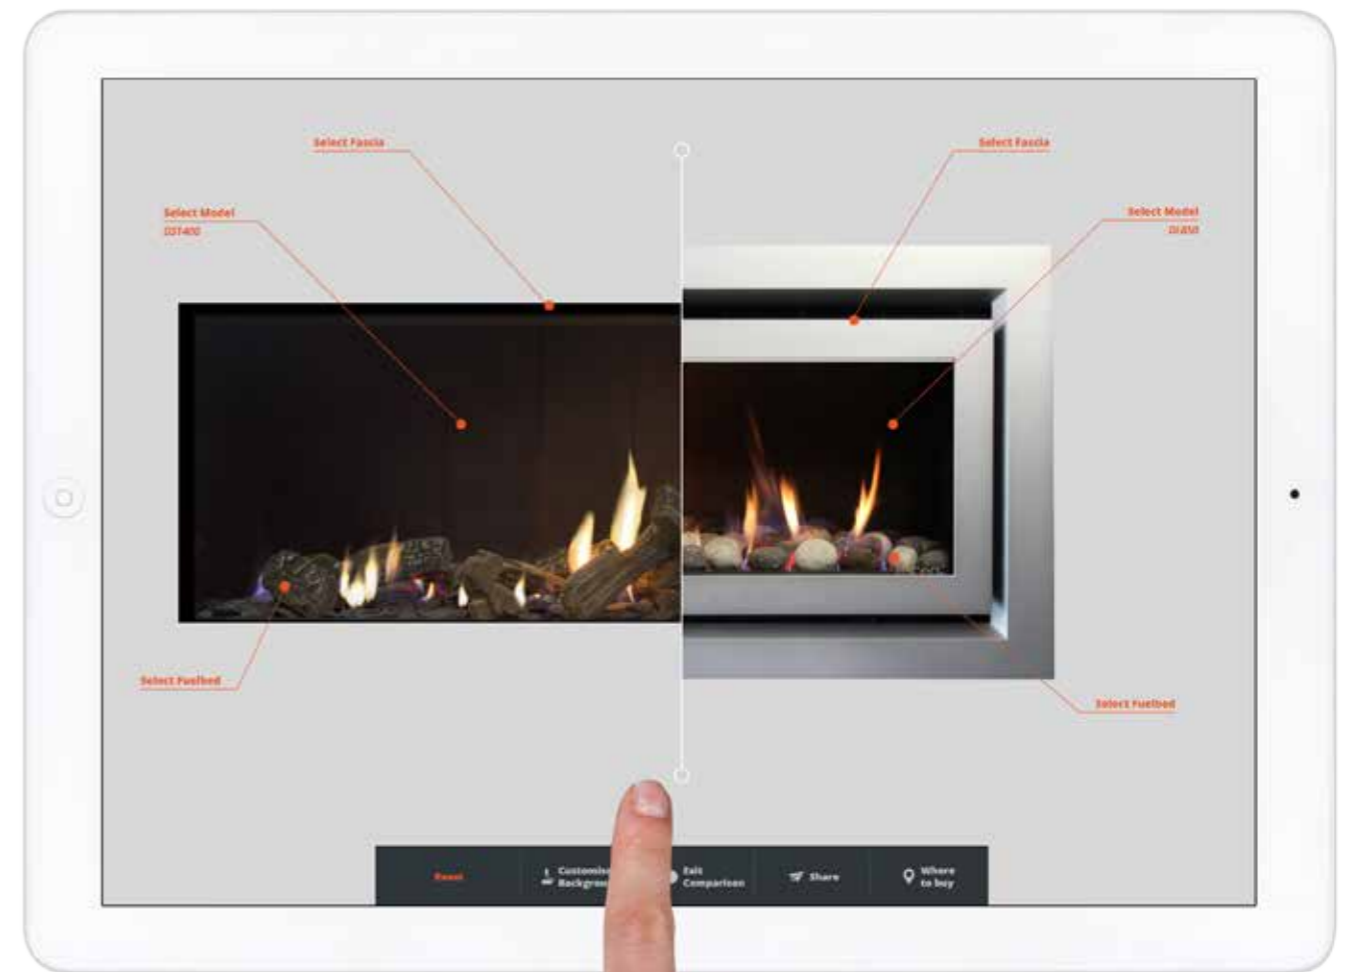

When connected to your home network our Smart Heat system lets you turn on your fire through your Smart Phone or any secure internet connection and integrates with most Home Automation systems. It keeps the room at the temperature you select and continuously adjusts to ensure the most efficient burn – which is what we mean by Smart Heat.

Available on all indoor fireplaces.

Design your fireplace

Undecided on which fascia or fuel bed suits your home?
Escea's Design Your Fire lets you try on and compare the different fireplace, fascia, fuel bed and wall combinations.

All Escea indoor gas fireplaces come with a wireless remote (thermostat and timer integrated), and are equipped with Escea's mobile Smart Heat capability. Note, indoor fireplaces require a wired connection to your internet router for Smart Heat to function. This cable is included only on DX and DS Series fireplaces, but is an optional extra across the full indoor range.

*Cavity size may vary depending on installation requirements or fascia type. See installation manual for more information.
