Hi Wall Split System

Haier

Who is Haier? World's largest home appliance manufacturer.

Haier is the number one brand of major appliances in the world in volume sales ⁽¹⁾

Founded in 1984 – 2014 marked our 30th year

Over 80,000 employees across 30 countries

GE APPLIANCES

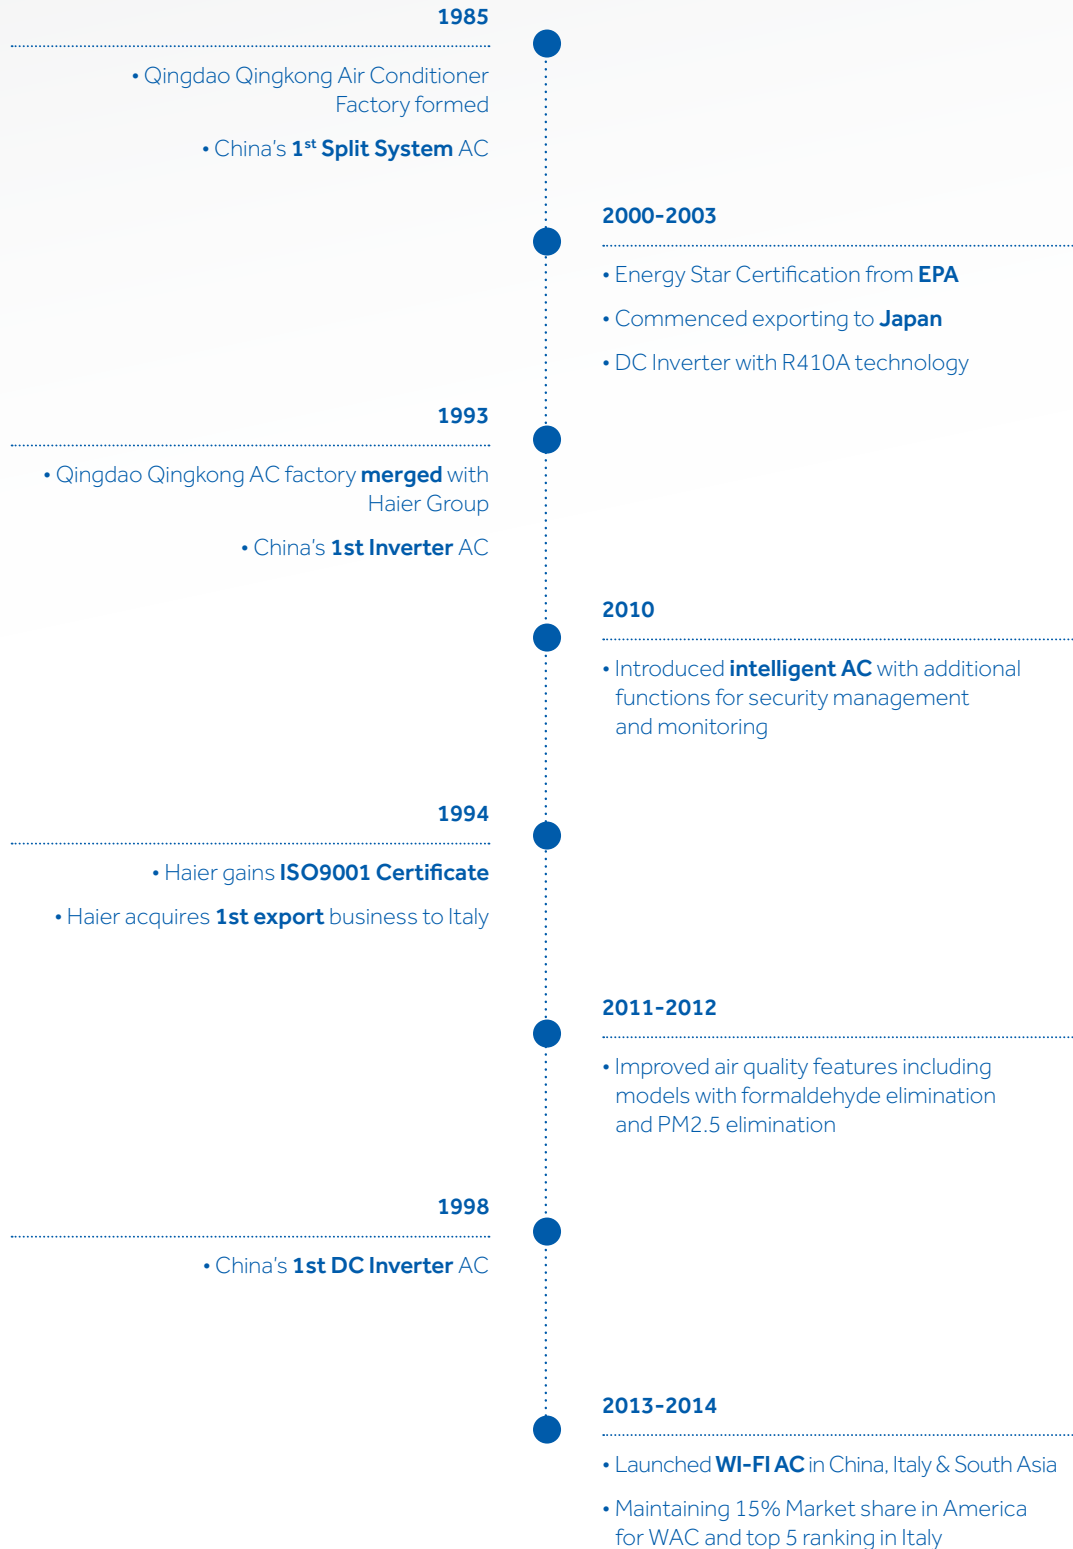

Recently Purchased GE Appliances

Distributed by Fisher & Paykel, a wholly owned Haier subsidiary

The evolution of **Haier Air Conditioning**

⁽¹⁾Source Euromonitor International Limited; Consumer Appliances 2017ed, % unit share, 2016 data. Major Appliances category is the sum of dishwashers, home laundry appliances, large cooking appliances, microwaves and refrigeration appliances.

Comfort

The innovative design of Haier Hi-Wall Split System allows super quiet operation and increased airflow for maximum comfort

Dry

When the unit is working in dry mode the indoor fan motor speed is adjusted automatically according to the temperature gap between setting temperature and room temperature. To achieve mild or strong dehumidification.

Self Clean

With a new-generation hydrophilic coil, when the air conditioner is in cooling or drying mode the dust on evaporator will be taken away by condensed water.

Interior of the unit dries out automatically after use.

Auto cleaning

This function dries the wet heat exchanger to prevent the breeding of molds and bacteria. It eliminates the odor from the unit and saves inconvenience from cleaning the filter.

Intelligent Air

Airflow is directed in the ideal direction to maximise efficiency.

Sleep Mode

Special program designed to overcome being too hot or too cold at night, to ensure the utmost comfort during your good nights sleep

The airflow is directed upwards in cooling mode.

The airflow is directed downwards in heating mode.

Performance

The desired temperature is reached quickly and efficiently and then stabilised for ultimate comfort with Haier's A-PAM DC inverter technology

A-PAM DC Inverter Control

A-PAM control technology allows Haier DC Inverter to work stably at low frequency and with greater power at high frequency while allowing energy-saving and quiet operation, compared with non-inverter models.

Comparison with non-inverter Technology

Quick Comfort

Inverter air conditioners supply the exact power needed to reach the set temperature in around half the time required by conventional models, cooling or heating the room rapidly.

Stable Temperature Operation

Inverter units can quickly and efficiently adjust and maintain the operating temperatures within the 'Comfort Zone' eliminating temperature fluctuations associated with traditional on/off units.

MEPS

Minimum Energy Performance Standards.

Haier Air conditioners exceed the Australia and New Zealand minimum energy efficiency Standards.

Tested in Australia to exceed AS/NZS3823. See <http://www.energyrating.gov.au> for more information.

Blue Fin Heat Exchanger

The Haier new generation blue aluminium fin has an anti-corrosion coating making the unit more durable, while the super hydrophilic performance enhances the heat exchanging efficiency by 40%, saving energy, compared to non-Blue Fin heat exchanger models.

Blue fin advantage

Effective heat exchange area

Defrost time
